CARSTYLING.HU TUNING SHOW, HUNGEXPO

In 2008 we took a big step forward. We moved our event to Budapest, and made the greatest car tuning exhibition of the Hungarian scene ever. At the first time, our show was mainly focused on pure car tuning, but during the following years we expanded it with many new features and exclusive programs like: stands and demo cars of international tuning companies, drift shows with professional pilots of the international scene or hot shows with the world-known team of The Fuel Girls. The number of the showcars from the international scene has become larger and larger every year. Since 2010 we've also had a very unique program: our team totally rebuilds a serial car live, during the three days of the show. Since 2011, we've given place for the National Gymkhana Championship of Hungary, and also had our own girls team called Carstyling Dolls.

AUTOMOBIL & TUNING SHOW (AMTS), HUNGEXPO

Next to the tuning tematics, our show improved with many curiosities of the world of mobility during the years. For now, we have the "Hungarians in the International automotor Industry" exhibition, a "Veteran Car Pavilion", a "Cabrio Exhibition", and every year more and more of car importers and saloons. We have celebrity guests every year - like Ken Block or Sidney Hofmann, or John D'Agostino - and our visitors can also win a tuning car with their ticket. Our new brand, the Automobil és Tuning Show (AMTS) was born in 2013. Our mission is to bring more potent customers for our exhibitors, and also to give an even more colorful experience for our visitors year by year.
